## **Green IT Expo 2010**

8-10 November, London, United Kingdom

An educational forum aimed at those who are actively implementing or beginning to formulate more sustainable computing strategies. The event is designed to showcase thought leadership, environmentally-friendly technologies, green innovations, the latest tools & techniques and specialist advisors operating in the area. The Expo will allow participants to:

- Understand the key challenges ahead for IT departments and the industry as a whole
- Keep up-to-speed with significant developments at a local and international level
- Ensure compliance with the latest legislation and government directives
- Review a wide range of environmentally-friendly IT products and services
- Formulate greener IT strategies for the short, medium and long-terms
